A. Work procedure

1. Dismantle the tail skid cover.
2. Hang up the arrestment spring.
3. Release the screwed joint: the tail skid suspension - draw bar.
4. Dismantle the two screws M10x16 from the silent blocks and remove the tail skid.
5. Dismantle the tail skid wheel.
6. Mount the new tail skid complex in the reverse sequence, including the tail skid cover.

Notes:

1. Use new split pins for locking the screwed joints on the draw bar and the tail skid axis.
2. The dismantled components of the original tail skid to be posted immediately to the manufacturing plant LET k.p. Uh. Hradiště-Kunovice CSFR.

B. Material required for one plane modification

3)

Pos.	Unit	Quantity	Name	Drwg. No. - Standard	Nomenclature
